SUBMISSION: Inquiry into Tackling Climate Change in Victorian Communities

Dear Sir/Madam,

This Inquiry is just another example of the gross discrimination and outrageous oppression being inflicted upon fossil fuel doyens in Victoria!

We contend that the Magna Carta (on its proper construction) protects fossil fuel billionaires' entitlement to ongoing compulsory contributions from Victorian energy consumers and taxpayers and that this entitlement has been insufficiently protected by the Victorian ALP government.

As a result of ongoing egregious failures to protect Coal Diggers rightful rights, elitist, leftist-green energy alternatives (i.e. solar extractors on the roofs of mums & dads houses and wind exploiters in farmers' fields) have been allowed to undermine the legacy position of coal (and to interfere in the growth of our other beloved, gas) to grievously infringe our said entitlement to profits and subsidies.

This assault on our effluence is plainly unAustralian and we contend that it sounds in compensatory and punitive damages under the Investor State Dispute Settlement clauses of the TPP, and related neoliberal international agreements that are intended to safeguard our legacy power over power, and profits to ensure our continued effluence into the future.

With our high level Attorney, Lignite Pit QC, will see you in court!!
